

# Genie Table

## OPENING YOUR GENIE TABLE

- 1** Locate lever beneath table surface and **pull to the right**, releasing the lift/lower mechanism.

- 2** With the **mechanism engaged**, lift/lower the table to any desired height.

NOTE: When the table in the lowest position, the wheels will allow it to move front-to-back only – not side-to-side.

- 3** **Release lever**, table will stop at the chosen height.

NOTE: When the table is raised above 8", the wheels will allow the table to move side-to-side only – not front-to-back.
